

Atos Origin showcases its latest innovations at Cartes 2009 in Paris

Paris, 17th November 2009 - Atos Worldline is participating in the international Cartes 2009 trade exhibition, the world's leading event for smart cards and ID, being held from 17th - 19th November 2009 at the Paris-Nord Villepinte Exhibition Centre. Atos Worldline is showcasing its latest innovations in payment terminals and contactless payment and loyalty solutions.

Atos Worldline, leader in hi-tech critical electronic transactions and specialist in electronic payments and eCS, is presenting its latest innovations on booth 4N002:

YOMANI: Atos Worldline's new payment terminal aimed at high volume retail

Designed as the solution of choice for retail payment applications, the terminal is fitted with a USB interface which guarantees optimal connectivity with the Electronic Cash Register (ECR) by means of a "single wire" concept. Thanks to its internal architecture, the new terminal also responds to the multi-acquisition demands set by the SEPA initiative.

Sips Voice and Mobile: new remote payment channels

In a multi-channel payment environment, Atos Worldline offers a single service for fully secure remote payments whichever channel the user chooses: Web, SVI or Mobile phone.

The Voice and Mobile channels of Atos Worldline's SIPS remote payment solution offer a seamless level of functionality, resulting in a multi-channel solution which raises the visibility of online merchants whilst reducing their costs. With its flexible integration and ease of use, the SIPS multi-channel solution simplifies the process of buying with just one click, and allows the payment flow to be adjusted according to the channels used.

MP3: All payment methods are administered from a single platform

With its Multi Pay Page Platform solution, Atos Worldline now centralises the management of all payment solutions on a single platform, integrating the strong authentication process, form handling, and barcode or card readers whether for swipe, smart or contactless cards.

BO Web 2.0: back office payment in real time web mode for small and medium sized businesses

Atos Worldline offers the real time Web 2.0 monitoring tool for tracking back office TPE activities. This tool focuses on the needs of small and medium sized businesses in terms of dashboard and summary data for transaction management or discounts.

Brand In a Pocket: paperless ID for payment and loyalty applications in barcode form on your mobile

Digital Identity: strong authentication remote payment in anticipation of electronic ID cards (a case study presented in partnership with Rentacar in the context of the national FC² project).

Atos Worldline is also contributing to Cartes Congress 2009 with 4 conferences:

- **“Strong identification, typology and hierarchisation of the solutions”** by Stéphane CAUCHIE, R&D Engineer, Atos Worldline
'Data Protection' slot - Tuesday 17th November - 12:00-12:30.

- **“International retail banks: how to standardise infrastructures for payment management”** by Pierre HERRAIZ, Electronic Banking Manager, Atos Worldline
'Banking Leader or Outsider?' slot - Wednesday 18th November - 16:45-17:30.
- **“Mobile phone: privileged link between brands and customers. A new generation of contactless and dematerialised loyalty cards is born”** by Gérard OLIVER, Retail and Industry Marketing Manager, Atos Worldline
'Loyalty, Gift Cards & CoBranding' slot - Thursday 19th November - 14:00-14:30.
- **“E-commerce: how to meet the PCI DSS requirements from Visa and Mastercard?”** by Xavier BRUCKER, Remote Payment Manager, Atos Worldline
'Transactions at the point of sale' slot - Thursday 19th November - 14:30-15:00.

Sesames Awards

Atos Worldline has been nominated for, and is among the finalists in, the 'Loyalty Application' category of the 2009 Sesames awards for its innovating 'Krokodile' project: The next generation of co-branding. An innovative solution for co-branded cards.
