

ONLINE SPORTS BETTING AND GAMBLING >>

Focus on the frontal and secure archiving

SUMMARY OF REGULATORY REQUIREMENTS

As part of the opening of the French market of online gambling and betting, the Draft Law plans the operators that hold French agreement to archive all the gambling transactions between the gambler and the operator's technical platform in real time on a hardware system located in Metropolitan France. All the data exchanged between the gambler and the operator pass through this system.

The objectives of this hardware system called "the Frontal" are to:

- » connect gamblers to the dedicated site with a .fr domain name;
- » store and archive gambling transactions.

"THE FRONTAL" CONSISTS OF TWO PARTS:

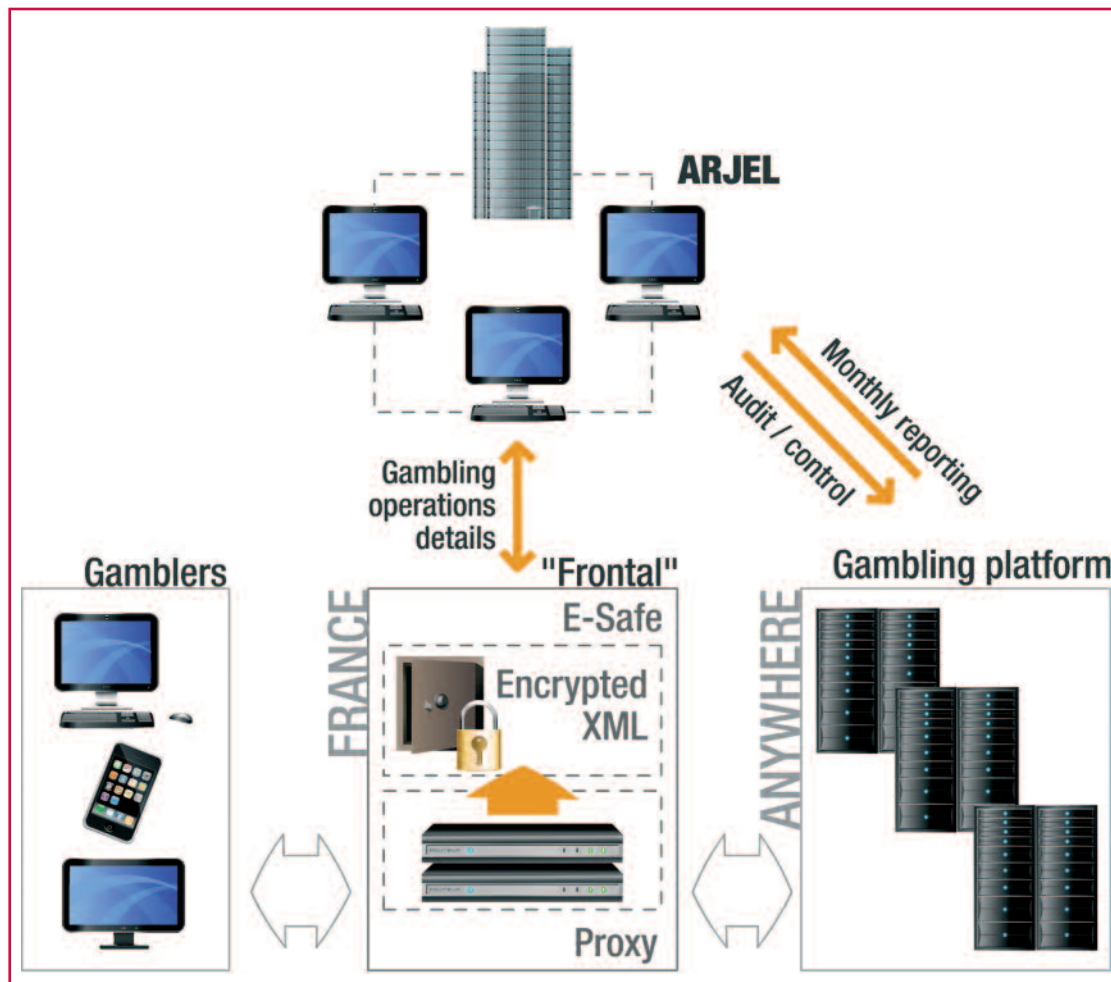

"The bottom" part conveys the data to the gambler through the site with the .fr domain name and captures the data to archive in real time.

"The top part" serves as a safe and archives the captured data for 5 years. This secure archiving solution can be supplied by actors that specialise in legal archiving applications and comply with the security standards such as RFC3161, SHA512, XaDES-A, NFZ42013.

ARJEL : Autorité de Régulation des Jeux En Ligne (*Authority for the regulation of online gambling*)

This authority will be an independant administrative authority and it will makes sure that the objectives of the online gaming and betting will be met. It will put the gaming and betting operations under surveillance and will fight against illegal websites and frauds.

SPECIALISED HOSTING AND SECURE ARCHIVING WITH EVIDENTIARY VALUE

With over 20 years of experience in the specialized hosting of mission-critical services and secure archiving with evidentiary value, Atos Worldline will provide a set of solutions that allow online gambling operators to host and exploit their platforms and archive the gaming and betting transactions.

- » state-of-the-art physical security policy;
- » ISO 9001 / 2008-certified hosting;
- » ISO 27001-certified information security management;
- » production process based on the ITIL standard.

SECURE HOSTING OF THE FRONTAL IN METROPOLITAN FRANCE
